

Where health-tech solutions are used

Rapidly growing health-tech solutions have been contributing majorly to the following areas.

1

Administration:

Used for effective and efficient management of hospitals, clinics, etc.

2

Tele-medicine:

To bridge the geographical gaps between doctors and patients.

3

Surgery:

Advanced scanning and AI-based surgical tools to reduce errors.

4

Diagnosis:

Advanced radiology or imaging tools to enhance diagnosis and avoid errors.

5

Stock management:

To avoid pilferage or theft. Also, to avoid losses due to expiration and improper flow of stocks.
